EXPERIENCE

Software Engineer at Latinsoft de Costa Rica 01 March 2022 – 15 February 2023

- Software Developer in PHP, Javascript. Using SQL Server Management Studio 2014 and technologies as JQuery, Ajax.
- Supporting the 24/7 gym system
- Remote customer support
- DigiSoft fingerprint checkin installation.
- Configuration and publishing of mobile applications in Android (Google play store [Android Studio]) and IOS (App Store Connect [XCode])

Internship at CTP Ulloa High School, June 2017- June 2018

- I worked developing a Software application for this High School.
- This application was developed in PRISM framework and C# language with Microsoft Access as Database.
- It allows them to automatically create the schedule in which teachers have to monitor the high school exams. Also, it has all the maintenance of teachers, subjects and classrooms
